The War Food Administration is urgently calling for 1,500,000 more home gardens in 1945... a total of 20,000,000 growing food for Victory.

Most canned vegetables are again rationed because of scarcity... our armed forces need an increasing amount of food, and we at home must produce more to meet this necessity... You can help individually with your Victory Garden and thus assure yourself an adequate supply of high vitamin vegetables to maintain health and efficiency.

Think of the thrill in raising your own delicious vegetables and fruit... your pride in helping your country to solve its food problem.

We recommend Sawco Japy as an effective means of harassing and destroying the increasing menace of Japanese Beetles.

Certain definite bacteria *Bacillus Popillae* and *Bacillus Lentimorbus*, which are inoculated in the soil are known to kill Japanese Beetle Grubs by infecting them with "milky disease." Sawco Japy or "Milky Disease Spore Dust" contains at least 100 million viable spores of either or both of these bacterias per gram of product. These bacteria are not harmful to living plants or humans.

Thoroughly mix one pound of Sawco-Japy with two pounds of coarse sand or dry soil and apply this mixture uniformly over 4000 sq. ft. Brush or water into soil immediately after application to prevent loose dust from being picked up by the wind.

THE FIRST 20 FEET, BLOOMING IN MAY AND JUNE

This half of the border is at the peak of its late Spring bloom. The tall clump at the right in the back is purple Siberian Iris; the one at the left is the left with pink Lupins continued with tall bearded Iris in various colors from yellow to purple. Then follows the Hemerocallis next to the Lupins. Other outstanding plants here are: Veronica, Heuchera, Scotch Pinks and Dianthus, Beatrix.

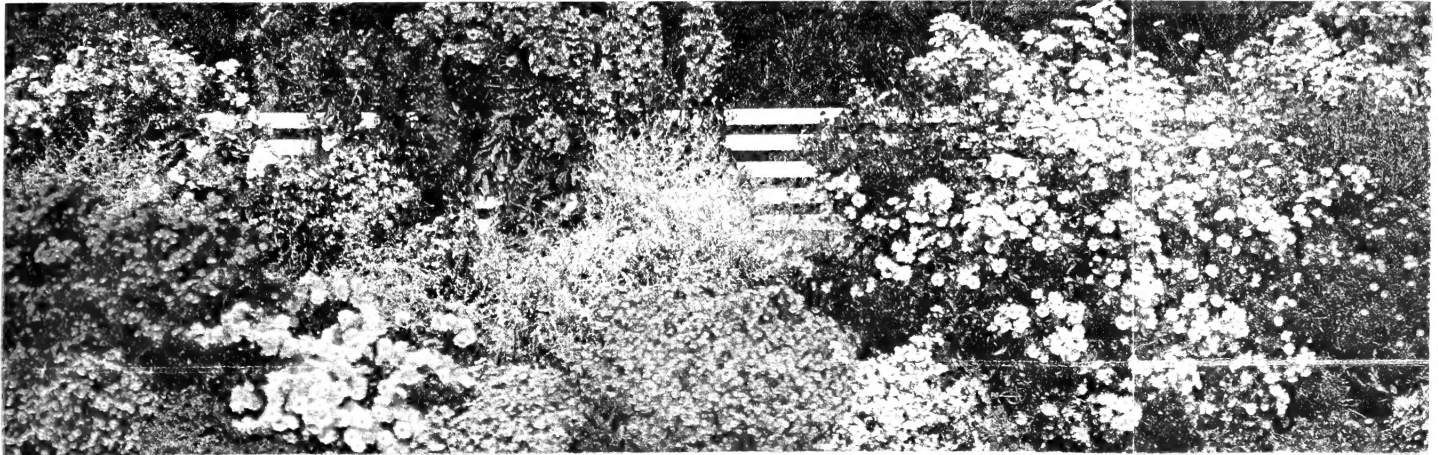

THE FIRST 20 FEET, BLOOMING IN JULY AND AUGUST

Here in Midsummer is the part of the border shown above. Notice that the Iris foliage is still effective. The hardy garden Phlox is the main feature, with salmon, pink, reds and white along the back and middle. Along the front are Shasta Daisies, Platycodon and Veronica. In the right-hand corner are Tiger Lilies.

THE SECOND 20 FEET, BLOOMING IN JUNE AND JULY

This half of the border was planned so that some perennials would be at their height in early Summer and again in the Fall, as can be noticed by comparing this picture with the one below. The background here is furnished by hybrid Delphinium in purple and blue and by tall yellow Thalictrum (Meadowruce). The white lilies are Regals, the orange ones are Umbellatum. Some of the other plants are Delphinium Belladonna, Bellamosa and the dwarf Chinensis. Along the edge we have the yellow Oenothera glauca Frascri.

THE SECOND 20 FEET, BLOOMING IN SEPTEMBER AND OCTOBER

This is the same half of the border as shown above. The Delphiniums which have been cut back before going to seed after the June blooming, are having a second blooming here in the Fall picture. The hardy Asters which are outstanding in this picture were only low clumps of foliage in June-July period. The varieties are: on the left is Red Rover, Mt. Everest on the right. The pink Chrysanthemum on the left is the famous Amelia or Azaleamum. Along the edge are dwarf Asters and Plumbago; Artemisia, Silver King, can be seen between tall and dwarf Asters.

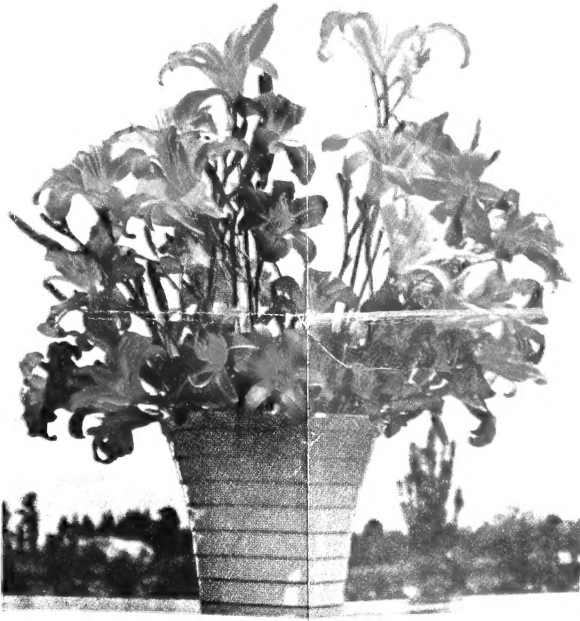

DAYLILIES, SUNSHINE SERIES

Many people prefer the paler tints of lemon and gold, and to enable our customers to have some of the better new varieties in these light colors at a moderate price we have selected this Sunshine Series. They include some of the finest sorts ever produced in these particular colors, to be sold unnamed and unlabeled, in mixture only. \$1.50 for 3, \$5.50 per doz., \$40 per 100

Daylilies

From Mr. H. M. Russell of Spring, Texas, have come the Daylilies featured here. They are the result of years of selection and hybridizing on his nine-acre farm, and they represent the cream of the crop. For every plant chosen, hundreds have been rejected because they did not meet Mr. Russell's rigid specifications.

The natural-color photographs reproduced here show the rich bright colors of these Daylilies. Selections have been made on the basis of color, profusion of bloom, lasting quality, and plant habit. Of the easiest possible culture, these splendid, healthy plants promise to make this old-time flower even more popular, for they are the perfect answer for a number of planting problems.

DAYLILIES, JACOB MURRAY SERIES

This bowl of 30 or more separate types is but a part of the many colors included in this mixture. All are unusual colors and vary as to height and time of bloom. They are a definite addition to your perennial border. \$1.80 for 3, \$6.75 per doz., \$47.50 per 100

A Perennial Pageant

FROM MAY TO OCTOBER

This perennial border was specially designed to be a thing of beauty from spring to frost, it happens to be about 40 feet long and 5 feet wide. You can easily reproduce it in your own garden on a larger or a smaller scale by planting Collections A or 1A. Along with your order, we furnish you with planting charts, the principle behind them is that when one set of plants has finished blooming, others which are behind them, and alongside them, come into flower—there are no bare spots. You will observe that each pair of pictures shows the same section of the border, but at different dates, each half having been photographed twice.

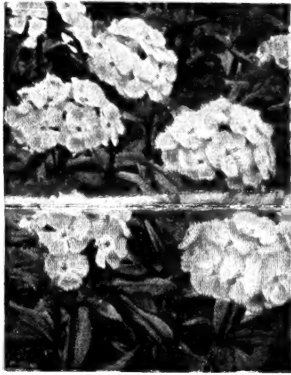

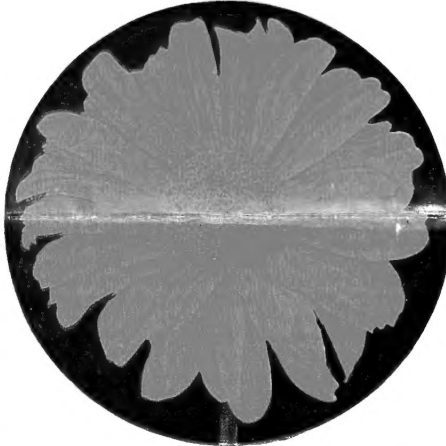

160 Hardy Perennials, comprising the 41 varieties shown here, in natural color, for a border 40 feet long and 5 feet wide, or an equivalent area. Catalogue value \$60.
